

# Manufacturers Selling Flame Retardant-Free Office Furniture

CEH partnered with HDR Architecture, North America's second largest architecture firm, on a survey to identify office furniture suppliers that offer some or all of their products made without flame retardant chemicals.

Buyers should be aware that:

1. Some fabrics contain flame retardant chemicals, so it is important to specify only flame retardant-free fabrics.
2. It is challenging for some manufacturers to determine whether their plastic parts contain flame retardant chemicals, especially if recycled plastic is used. Manufacturers are beginning to explore this supply chain issue more deeply. To promote this investigation and ensure the accuracy of the providers claims, purchasers should request verification about the presence or absence of flame retardants in plastic parts.
3. This survey does not apply to upholstered office furniture products that needs to meet Technical Bulletin 133, a flammability standard for use in special occupancy spaces. TB 133 furniture typically contains flame retardant chemicals in one or more of the components.

**Companies listed with an asterisk (\*) are labeling their products sold nationwide for flame retardant content, not just for California as regulated by law.**

The following companies have removed toxic flame retardants from ALL of their products:

**Andreu World**

Andreu World
